UNRIVALED NEW BUSINESS AND DEAL ORIENTATION OPPORTUNITIES WITH THE GLOBAL COMMODITY FINANCE COMMUNITY

The essential destination for the commodity finance community

TXF has provided the commodity finance community with high-quality news, data, events, and awards for the past 11 years, and has become the go-to resource for the latest developments, insights and research and for business development in the industry.

Connecting you with the right people, all in one-business trip

We've seen first hand the importance of meeting face-to-face and our dedicated team curate event attendee lists with the most active lenders, producers, traders, law firms and insurers in the commodity finance industry. Our events provide the tools to maximise networking opportunities in the commodity finance community, through personalised introductions, our networking concierge service, and meeting focused programmes.

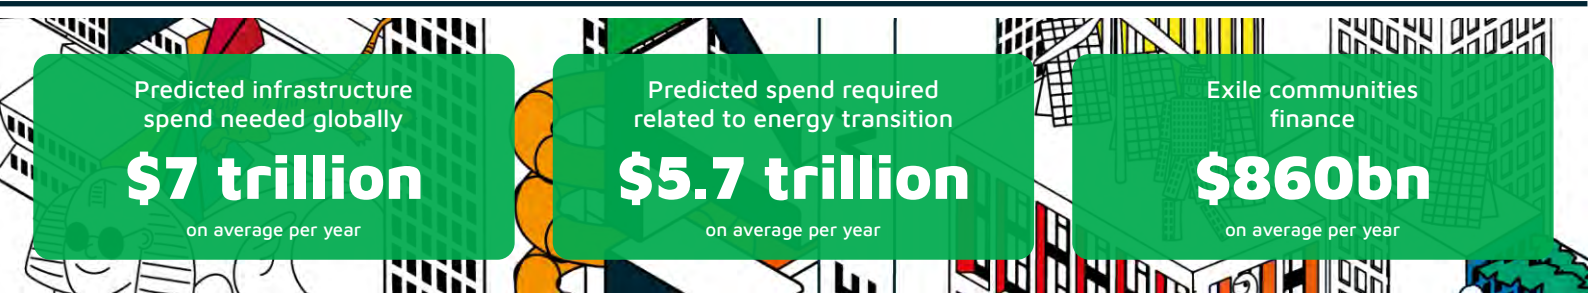

We spotlight activities of lenders, producers and traders tracking, reporting and analysing everything they do in the market and collect the data on the deals they've backed

We aim to help our customers and clients stay on top of their game with the latest developments in the industry and connect you with the right people to help business development and origination. We bring the commodity finance community market-leading insight via our in-house intelligence team.

Maximise deal-origination opportunities

Our parent company Exile group brings together our 3 key brands - TXF export, trade and commodity finance, Proximo - project finance and Uxolo - development finance. Covering the full spectrum of global commerce: from a 28-day letter of credit that allows an SME in the north of England to fulfill a small bilateral export contract to a 20-year multi-party, multi-billion dollar rebuilding project in Ukraine.

Our events bring together these communities to enable attendees to maximise deal-origination opportunities with events which are co-located with project, export, commodities and development finance dealmakers.
