

# ORBIAN SUPPLY CHAIN FINANCE TO DRIVE SUSTAINABILITY

*"We can be optimistic about the unbelievable acceleration in the attention that is being paid around sustainability best practises across the board and we need to drive our efforts towards a full set of solutions to support these best practises and empower change"*

Thomas Dunn, Chairman @Orbian

Most of largest global companies already have some form of Supply Chain Finance **BUT**, far too much attention is paid on granting access only to the largest suppliers; often those that least need it.

## IMPORTANCE OF UNIVERSAL SUPPLIER ELIGIBILITY TO INFLUENCE SUSTAINABILITY BEHAVIOUR

**Economic advantages** of liquidity magnified as smaller suppliers introduced

**Support for all suppliers from more vulnerable countries:** multiplication of social, environmental and behavioral benefits

Pressure for consistency as **support for accounting treatment**

Public demands for the large and the strong to be **embracing the smaller and weaker**
